

Made in Haven!

Time Limit per Test : 1 Second

June 5, 2023

An unforgotten legend of *Harmony Haven Emporium* is widely-known amongst Whispering Moon Clan as illogical yet must be followed. There are two rules in *Harmony Haven Emporium* legend :

- Each store owners must not sell leftover items.
- Each buyer must buy in pairs and each item's price is different (If item1's price = 10, item2's price cannot be 10).

Luckily, you were visiting Whispering Moon Clan and they need your help to know a number of leftover items.

Input

First line is t -number of testcases ($1 \leq t \leq 10000$).

Each testcase contains of one line of n ($1 \leq n \leq 200000$) and one line of n -amount of item's price p ($1 \leq p \leq 10^9$)

Output

Print t -lines of leftover amount

Examples

Test Case 1

Input

```
5
3
1 2 1
4
2 2 6 6
6
1 1 2 2 3 3
7
4 5 4 5 4 5 4
2
1 2
```

Output

```
1
0
0
1
0
```

0.1 explanation

In sub cases 1, the buyer must take 1 and 2, therefore only 1 leftover items.

In sub cases 2, the buyer must take 2 and 6, another buyer must take 2 and 6.
